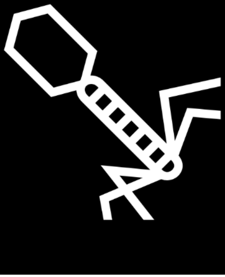
5

Persistent Malware



COST 8 DMG 2

Obfuscated code saved to the Common Log File System

Take a card from the event row for free

Signed Driver

COST 10 DMG 2

Signed Razer mouse driver privilege escalation

Draw a Card

Browser Plugin

COST 2 DMG 5

Malicious Chrome extension supply chain attack

1 Draw a Card

Malicious Driver

COST 4 DMG 3

Malicious driver deployed for keyboard input interception

Copy a card in your hand

New Service

COST 5 DMG 4

Persistence using Windows service disguised as EDR updater

2 Draw a Card

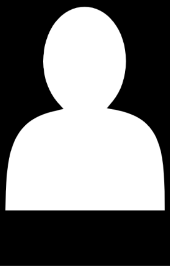
Cloud Bucket

COST 3 DMG 4

Data exfiltration through public cloud storage bucket

1 Draw a Card

New User Added

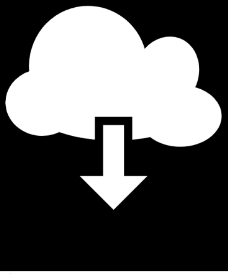


COST 4 DMG 4

New user assetmgt created with administrator access

6 Draw a Card

Cloud Metadata



COST 10 DMG 1

Cloud access through Instance Metadata Service exfiltration

5

Multi-Factor Auth.

COST 6 DMG 2

MFA use denies attacker access to application access

Use a card from your discard

Watering Hole

COST 📶 8 🪙 DMG 3

Redirected to malicious website through Facebook Messenger

5 🪙

Cloud Account

COST 📶 8 🪙 DMG 2

Endpoints compromised through O365 Ruler payload delivery

3 🪙

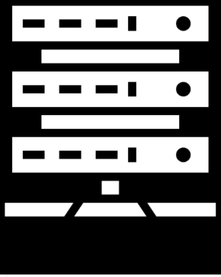
Credential Stuffing

COST 📶 4 🪙 DMG 4

Citrix internal network access through reused credentials

2 🪙

Web Shell



COST 📶 1 DMG 5

Persistent access to web server with isolated code

1 🪙

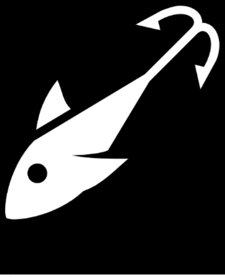
Malicious Kubelet

COST 📶 2 DMG 5

Kubernetes takeover with malicious kubelet deployment

3 📶 Draw a Card

Fake Installer



COST 📶 4 DMG 4

Gain access through a fake installer

Draw a Card

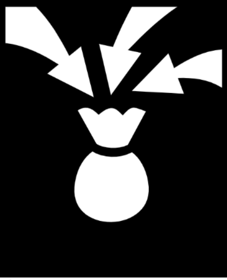
O365 Macro

COST 📶 1 DMG 6

Command execution through O365 Excel document macro

2 📶 Draw a Card

Sysmon Reporting



COST 📶 4 DMG 3

Malicious PowerShell invocation detected

4 🪙

Shadow Copy

COST 📶 5 DMG 3

Access protected SAM database using Volume Shadow Copy

1 🪙 Draw a Card

Password Audit

COST 📶 4 DMG 3

DPAT reveals systemic password selection exposure

1 📶 Draw a Card

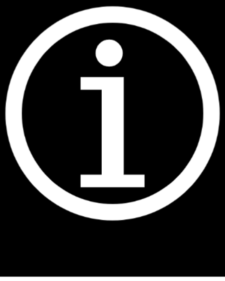
Sinkhole Domain

COST 2 🪙 DMG 5

Malicious activity identified through a sinkhole DNS response

2 📶

Log Analysis



COST 1 🪙 DMG 5

SIEM logging analysis identifies APT activity

2 🪙 Draw a Card

Endpoint Detection

COST 3 🪙 DMG 4

EDR identifies program execution blocked by safe list

4 📶

User Behavior

COST 5 🪙 DMG 3

UEBA suspends cmd.exe process launched from LSASS

6 🪙 Draw a Card

MFA Bypass

COST 📶 10 🪙 DMG 1

Office 365 MFA bypass using named location access

5 📶

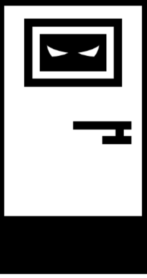
Zero Trust

COST 6 🪙 DMG 2

Assumed breach principle mitigates scope of incident

2 🪙 Draw a Card

Identity Mgmt

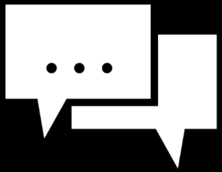


COST 4 🪙 DMG 3

JIT/JEA policies stop unauthorized use and privilege escalation

2 🪙

Windows Forensics



COST 📶 1 DMG 5

Identify attack activity with SRUM-Dump
